The best change in Lightroom 5 is the one that makes me the most happy – refinements to editing. The old versions of Photoshop didn't have powerful plug-ins for handling images in a traditional manner, which made Lightroom virtually useless. Some of Lightroom's most powerful features, such as correcting, exposure and color, were even left out of Photoshop. But now, with the introduction of five new tools, regular photographers can start taking their editing seriously again with the familiar feel of a piece of software used for years. I will talk about them and their values specifically, but that doesn't mean they may not be of use to you. **1. Color Correction**: The first and foremost, and most extensive of the "smart tools" giving a refined look to an image, is the new "Color Correction." The feature helps to correct problems while balancing color throughout an image. While the workflow component isn't very complex and doesn't require a lot of work, this is a very powerful tool that comes with a price – it affects an image's actual look significantly, while producing some very problematic results. For example, an image may start to look a little flat, and at the edges become too saturated or too muted. You may think that you have fixed an exposure problem by applying the correction, but this isn't always the case, because you may have made a mistake earlier in the editing process. The three options available in the "Basic Adjustments" tab of the "Color Correction" dialog, as well as in the "Advanced Adjustments" dialog, are:

We're excited to bring these powerful features to the web in the form of a mobile app. But we understand that Adobe Photoshop isn't just a mobile app anymore. It's a web application, and we want people who need its full power to trust it on the web. To this end, we're working on a new web-based editing app that will keep the convenience and the quality of the mobile app. Over the last three years, Chrome has been working to empower web apps that want to push the boundaries of what's possible in the browser. One such web app has been Photoshop. The idea of running software as complex as Photoshop directly in the browser would have been hard to imagine just a few years ago. However, by using various new web technologies, Adobe has now brought a public beta of Photoshop to the web. Now you can edit images in your browser — allowing you to easily make small changes to photos in your phone, tablet, or computer.Nov 9,
